Dear Patient:

Thank you for your concern about access to orthopaedic care in the Sea to Sky corridor. At Sea to Sky Orthopaedics it is our mission to provide our community with a well-rounded approach to orthopaedic health. We have been working hard to build a strong network that will create opportunities to provide exceptional and balanced care.

Helping patients in the Sea to Sky Corridor access local orthopaedic care is our priority and increasing our capacity to fix bones “at home” is part of our mission. Funding for “fixing bones” in Squamish is a critical and ongoing issue.

Funding future capital projects may include purchasing surgical equipment and expanding recovery room space. This will provide the means for expansion of the surgical possibilities at Squamish General Hospital.

You can support orthopaedic surgery in the Sea to Sky Corridor by submitting a donation to any of the following organizations:
